Thousands of Firms Register With Kaval Consulting Board.

30,000 ENGINEERS AT WORK

Committee en Industrial Preparedness Taking Inventory of Country's Business, at Same Time Shows Factory or Mill How It Can Be Useful In Times of Need to Army and Navy.

The returns from the vast industrial inventory now being made in every nook and corner of the Union by the committee on industrial preparedness of the United States Naval Consulting board mark a new and vital relation botween the business men of America and the federal government. Over 100 000 firms are being registered. The information gathered is the first fruit of the work of the army of 30,000 American engineers, members of five eminent scientific bodies, who form the field force of the committee organized to find out for the governnent the real industrial resources of the nation in time of war.

For this sweeping canvass, which is beaded by Howard E. Coffin, chairman, and W. S. Gifford, supervising director, the whole country has been highly systematized, with directing boards of the leading engineers in every state, the District of Columbia and Alaska. This marvelous smooth working organization of unpaid experts has already accomplished definite re-sults, and the great inventory, as shown by the reports of state chairmen now being received, is moving swiftly and satisfactorily to its end. Willing Co-operation.

The manufacturers of the nation, recognizing the highly qualified and conpartisan personnel of this mevement, which has the strong support of the president, the military heads and the Chamber of Compares of the Unit. the Chamber of Commerce of the Unit-ed States, have almost without exception responded with the most intelli-gent patriotism and the deepest inter-est in this close kuit movement for a thoroughgoing industrial preparedness They were called upon to give very comprehensive information on the adaptability of their factories, mills and mines to federal uses from the hour of inilitary mobilization, the data to be held in the strictest confidence for the sole scrutiny and benefit of the war and navy departments of the Unit-

A few manufacturers have doubted the ability of their plants to aid the government in warting. They have ilmost invariably changed their views when shown how little doult there is that on the outbreak of war practically all concerns not engaged in lines of work essential to the national needs would be stripped of their labor, either for the army or for manning other industrial plants vital for the supply of such needs, and that in the event of hostilities probably 80 per cent of the industries of America would of neces-eity be concentrated on producing the myriad elements of twentieth century

In the state of New York alone som 85,000 firms are being inventoried. In no case so far has the New York board no case so far has the New York board met, with definite refusal to give the desired information. The filled in forms are already arriving at Chairman J. G. White's office at the rate of several hundred a day, although this board asked many of the larger firms to sacrifice speed to accuracy.

The response shows almost manimized desire on the part of these board.

mins desire on the part of these business men, many of them of internaof the committee, and a summary of their letters discloses in the most intheir setters discloses in the most in-teresting and graphic way how the in-dustries of the Empire State could ad-just themselves to the needs of con-flict if—and, as Supervising Director Gifford says, "it is a very imperative 'if'"—efficiently mobilised in time of

A large capacity sash chain mater, for example, helicited he could with little difficulty produce cartridge cilips for rifles and machine guns, and a manufacturer of thrashing machinery was sure be could make 600 sixtuch shells per day.

How Makufacturers Hespond.

A maker of underwear declared he could turn out bundages and other smit goods for the army and navy and hod Crons services, a button maker thought his machines could be used for small munitions work, and a company manufacturing drugs stated that if could turn a considerable portion of its product into an adjunct for making cordine for shells.

Cha well known foundry not maker miles from Bunder of the out those and amountains, there is no the could be used that be could produce within a maker of Setting oven suggested that he could produce wobting with which to fasten equipment on soldiers, and a stample produce with the stamps produce with the stamps produce with the fasten equipment on soldiers, and a stamps produce with the fasten equipment on soldiers, and a stamps produce of condensed unit thought he doubt be of use to his giventsoon in time of war.

A leading boffulo manufacturer vicose, "We look upon if so a past rail, to all out the blank forwarded to use" the president of a great rail, tool wrote at president of a great rail, tool word at past rail, tool or so a great rail, tool or so a past rail, tool or so a post rail, tool or so a past rail.

RESTAURANTS AND SODA FOUNTS FNJOY A RUSH

Campaign Meeting Big Boom To

Restaurants and soda founts were alive with patrons from 11 o'clock until 4 yesterday afternoon. At the diner hour at the restaurants it was almost impossible a wait on the crowds. Gus Antona as stated that he had the best day his business has enjoyed to covered ward to be the control of the covered wards.

he had the best day his business has enjoyed in several months.

Around the soda founts it was dif-ficult to get waited upon, and not since the last circus day have these places done a bigger business. It was estimated that more than 6,000 visitors were in the city yesterday, and many of these attended the campaign meeting at Buena Vista park.

LIKE PROODIGAL OF OLD RUNAWAY GEORGIA BOY TURNS FACE HOMEWARD

Elberton, Ga., June 24.—Llonei Caldwell, fifteen years old, a son of W. C. Caldwell, of Pome, Ga., is on his way back home. He ran away about a week ago with an older chum and holoed it to Atlanta then to Augusta his chum deserted him. Lionel grew lonely and like the prodigal of old started back home. Jack Haler, coming along with his automobile about two miles this side of Heard-most everteek him seek he was a line of the started back home. mont, overtook him, as he was trudg-ing his weary way with blistered feet, and brought him to Euherton where he was given a pallet in the station house "sitting room" for Wednesday night, Thursday morning he hurried on towards kome to get bite of a fatted calf.

LINE O' DOPE

(CONTINUED FROM PAGE 4.)

Anderson next week." said Mr. J. J. Trowbridge yesterday, "but you can say that I will have some migthy fine pictures, "No, the local situation occasioned by the call to arms of the National Guardsmen ruined the show business this week," he continued, " the people being too busy attending the parades of the militiamen and the entertainments given in their honor to attend the shows."

Those who attend the Baraca Class of the First Baptist church this morning will go away feeling that they have heard a man and a message that they will never forgets Mr. B. m. Geer, of Greenville, scheduled to address the class. For many years he was professor of English in Furman university, and though he is not actively connected with this institution, he still has a hand in the affairs of the college, being treasurer. Mr. Geer is now engaged in the cotton mill business and is president of the Judson Mills, one one of the largest of several huge plants of this kind in Greenville. He is a native of this county, being born and reared nearer. He is a man every inch of him, and he is unlike most any other man you have ever known. But go and hear him, and hen you will understand.

NEW DESIGNS CHOSEN FOR OUR SILVER COINS

Different Money Will Be Minted by Government After July 1.

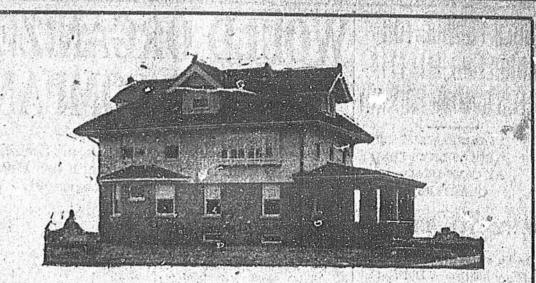

Dimes, quarters and half dollars of new design will be minted after July 1. Secretary McAdoo announced the a change will be effected in these pieces. The announcement disclosed that the half dollar has fallen practically into disuse. The new design was selected with the hope of restor-ing it to more general circulation.

Under the new collage each piece will be of different design. The half dollar and dime-models were made by Adolph A. Weinman and the quarter dollar by Hermon A. MacNell. Both are Scalptors of note.

collar by Hermon A. MacNell. Both are sculptors of note.

The face of the new half dollar bears a full length of Liberty, with a background of the American flag fiving to the breeze. The gradiess is striding toward the Cawn of a new day, carrying laurel and oak brackes, symbolic of civil and military glory. The reverse side abows an eagle perched high upon a mountain crag, wings unfolded Growing from a rift in the rock is a sapling of mountain pine, symbolic of Smalles.

The design of the twenty five cent piece is intended to typify the awakening of the scenning to its own protection, Secretary McAdoo'c amouncement stated. Liberty, a fell length figure, is shown stapping oward the country's gatoway, bearing upraised a shield from which the revering is hung Grayar. The right hand bears as oilys branch of peace. Above the head is the word "Liberty" and below the

"flome," said Spurgeon, "is the greatest of all institutions." And the famous author and editor, J. G. Holland, many years editor of Scribner's Monthly said: "Home, in one form or another, is the great object of life."

BUILDING PRETTY HOMES IS OUR SPECIALTY

Within the past few days we have started work on three beautiful homes in this city-one for Mrs. F. A. Carter, one for Miss Helen Hunter, on Calhoun street, and one for Mr. M. S. Nimmons, on College Heights.

And we are furnishing the Lumber and Material for a number of others through,

If you are thinking of building-it is an old term, but in this case a very true oneit will pay you to get our prices.
